

Hinged Cover and Hinged Cover Seals Accessory Items

> Hinged Cover & Hinged Cover Seals

- Range of accessories to provide protection against accidental damage and extra security
- Fully compatible with all call points
- Customised branding available

Product Overview

Fitting a transparent hinged cover to a call point provides additional protection from accidental operation. They are particularly useful in high traffic areas such as stairwells and corridors in schools and public buildings, where the volume of traffic can result in accidental operation of the call point causing nuisance alarms.

With the addition of the hinged cover seal, which consists of a breakable nylon tie down, the incidence of malicious false alarms can also be reduced, as to operate the device the seal must first be broken. This will deter the casual vandal whilst the device remains operable to the more determined user.

All MCP indoor call points and WCP outdoor call points can be fitted with these accessories. The hinged cover can also be customer branded. For more details please contact our sales department.
